Urban Dictionary: 304

Year 304 was a leap year starting on Saturday (link will display the full calendar) of the Julian calendar.At the time, it was known as the Year of the Consulship of Valerius and Valerius (or, less frequently, year 1057 Ab urbe condita).The denomination 304 for this year has been used since the early medieval period, when the Anno Domini calendar era became the prevalent method in Europe for ...

304 - Wikipedia

Type 304 is the most widely used austenitic stainless steel. It is also known as "18/8" stainless steel because of its composition, which includes 18% chromium and 8% nickel. Type 304 stainless steel has good forming and welding properties as well as strong corrosion resistance and strength.

Type 304 and 304L Stainless Steel Explained

Area codes 304 and 681 are telephone area codes in the North American Numbering Plan (NANP) for the entirety of the U.S. state of West Virginia.The numbering plan area (NPA) 304 was established in October 1947, with one of the original 86 area codes.Area code 681 was added to the same area in an overlay plan that took effect on March 28, 2009.

Area codes 304 and 681 - Wikipedia

A 304 Not Modified message is an HTTP response status code indicating that the requested resource has not been modified since the previous transmission, so there is no need to retransmit the requested resource to the client. In effect, a 304 Not Modified response code acts as an implicit redirection to a cached version of the requested resource.. Often it can be challenging to distinguish ...

304 Not Modified: What It Is and How to Fix It

3×× Redirection 304 Not Modified. A conditional GET or HEAD request has been received and would have resulted in a 200 OK response if it were not for the fact that the condition evaluated to false.. In other words, there is no need for the server to transfer a representation of the target resource because the request indicates that the client, which made the request conditional, already has ...

The HTTP 304 Not Modified client redirection response code indicates that there is no need to retransmit the requested resources. It is an implicit redirection to a cached resource. This happens when the request method is safe, like a GET or a HEAD request, or when the request is conditional and uses a If-None-Match or a If-Modified-Since header.. The equivalent 200 OK response would have ...

Grade 304 is a standard "18/8" stainless. It is the most versatile and most widely used stainless steel available, even though a wide range of alternatives are available; and has excellent forming and welding characteristics. The balanced austenitic structure of Grade 304 enables it to be severely deep drawn without intermediate annealing.
