Forensic linguistics, legal linguistics, or language and the law, is the application of linguistic knowledge, methods, and insights to the forensic context of law, language, crime investigation, trial, and judicial procedure. It is a branch of applied linguistics.. There are principally three areas of application for linguists working in forensic contexts:

Forensic linguistics - Wikipedia
Linguistic description is often contrasted with linguistic prescription, which is found especially in education and in publishing. [9] [10] As English-linguist Larry Andrews describes it, descriptive grammar is the linguistic approach which studies what a language is like, as opposed to prescriptive, which declares what a language should be like.

Although the anthropological approach to language ideology is distinctive, it overlaps with research in other disciplines. Approaches rooted in disciplinary linguistics, such as Critical Discourse Analysis , are anthropology's close kin, while political and social theorists writing on "ideology" are of obvious relevance.
