Computer Science (M.S., M.P.S. and Ph.D.)

In our research, we view visual computing as a closed loop: analysis methods (i.e. computer vision) extract rich scene models from visual data (e.g. images, 3D shapes), and synthesis methods (i.e. computer graphics) convert those models back into observable visual data. The two sides of this loop are mutually reinforcing: analysis of large-scale visual data helps to build/learn better ...

The Threshold Concept - UCL

Humanism, a paradigm that emerged in the 1960s, focuses on the human freedom, dignity, and potential. A central assumption of humanism is that people act with intentionality and values. Humanists also believe that it is necessary to study the person as a whole, especially as an individual grows and develops over the lifespan.
