The Ford FE engine is a Ford V8 engine used in vehicles sold in the North American market between 1958 and 1976. The FE was introduced to replace the short-lived (in the USA) Ford Y-block engine, which American cars and trucks were outgrowing. It was designed with room to be significantly expanded, and manufactured both as a top-oiler and side-oiler, and in displacements between 332 cu in (5.4 ...

Ford had a six-year head start on GM; and even with those years of product development lead-time, AND overhead cams, AND the option of multi-valve heads, the GM "LS" two-valve pushrod engine creamed Ford's top-heavy monster. For many years, if you didn't have an iron lung (supercharger) on a 4.6L, you had a turd.
