of an essential micronutrient, i.e. vitamins and minerals (including trace elements) in a food, so as to improve the nutritional quality of the food supply and provide a public health benefit with minimal risk to health.

WHO | Fortification of rice

Patanjali has partnered with FSSAI on this process of fortification. Fortification of staple foods such as wheat flour and edible oil by adding essential vitamins and minerals has emerged as a simple and cost-effective strategy to address micronutrient malnutrition. They are going to start the fortification tentatively by September 2017 for Atta.
