The largest 4Runner community in the world. I think it's a bit unfair to say "shove it" to a shop asking to be paid to perform diagnostics; just because you're asking for a "second opinion" doesn't mean the technician isn't going to start his diagnostics from scratch and spend time tracking down the problem (well he should at least, otherwise he may bite himself in the ass taking the previous ...

-and a 10 mm wrench if you're going to remove the negative battery terminal clamp. You have 2 options: 1) remove the ECU fuse for 20+ minutes (preferred); or 2) remove the negative battery terminal for 20+ minutes. Although less time might be required for reset, it seems that 20+ minutes is the common method.
