Nursing Case Studies | NursingAnswers.net

A case study, in general, is detailed research about the subject such as a person, a group of people or a unit, and its affecting factors. A case study in the nursing field does not really have a big difference. You can use it to study your patients as part of your daily practice in your practicum phase. Through this study, you can apply the lessons that you have learned in the classroom to an actual experience that you can use as leverage when applying for a job in the future.
