I studied Biological Sciences at Queen's University Belfast and then worked in England for a few years, in an organic chemistry lab. I was really fortunate to be able to move back home, and find a job not just in my field of science, but in a company that has made such an impact in the fight against coronavirus.

Membranes based on graphene can simultaneously block the passage of very small molecules while allowing the rapid permeation of water. Joshi et al. (p.752; see the Perspective by Mi) investigated the permeation of ions and neutral molecules through a graphene oxide (GO) membrane in an aqueous solution.Small ions, with hydrated radii smaller than 0.45 nanometers, permeated through the GO ...
