Tartarus (formerly known as Silent Akbar) is a 1.6-2.1 Extreme Demon mega-collaboration created and hosted by Riot. The level is designed to be almost humanly impossible and was therefore openly hack-verified by Riot to challenge the player community: whoever could verify it would receive a shoutout from Riot. Three players made significant progress on the level: Mullsy, Dolphy, and MetaManZ ...

1. This proof is, for all intents and purposes, complete. As noted on the page itself, however, the proof contains methodologies borrowed from other sources which, at face value, seem overly complicated. This is a reminder for me to go back and try simplifying the proof given the insight gained from the original.

A triangle is a polygon with three edges and three vertices. It is one of the basic shapes in geometry. A triangle with vertices A, B, and C is denoted .. In Euclidean geometry, any three points, when non-collinear, determine a unique triangle and simultaneously, a unique plane (i.e. a two-dimensional Euclidean space). In other words, there is only one plane that contains that triangle, and every ...
