FRRouting User Guide — FRR latest documentation

You would prefix the name of the Helper with the namespace that it can be located in. Within that namespaced directory, the loader expects it to live within a sub-directory named Helpers. An example will help understand this. For this example, assume that we have grouped together all of our Blog-related code into its own namespace, Example\Blog.

Helper Functions — CodeIgniter 4.1.9 documentation

User watch history and DVR library are not shared with other profiles on the account. Like Hulu Live, YouTube TV opens with program recommendations filled with on-demand content.
