The following setup was done using a Mikrotik RB951Ui-2HnD: Using the Winbox utility, connect to the device. As a best practice, you should reset the router with NO CONFIGURATION. Of course, if you have the router already setup to perform other actions do not do this step and instead use the script to configure as per your requirements.

Configuration for Mikrotik Routerboard (RouterOS ...

RouterOS can also be installed on a PC turning it into a router with all the necessary features - routing, firewall, bandwidth management, wireless access point, backhaul link, hotspot gateway, VPN server, and more. The feature that we will delve into today is RouterOS port forwarding.

First Time Configuration - RouterOS - MikroTik Documentation

Since RouterOS v6.43 the RouterOS bridge is IEEE 802.1ad compliant and it is possible to filter VLAN IDs based on Service VLAN ID (0x88A8) rather than Customer VLAN ID (0x8100). The same principles can be applied as with IEEE 802.1Q VLAN filtering (the same setup examples can be used). Below is a topology for a common Provider bridge:
