### E2800 Hybrid Storage System - E-Series Hybrid Flash | NetApp

You must cable the controllers to your shelves using the onboard storage ports. NetApp recommends MP-HA cabling for systems with external storage. If you have a SAS tape drive, you can use single-path cabling. If you have no external shelves, MP-HA cabling to internal drives is optional (not shown) if the SAS cables are ordered with the system.

### Detailed guide - AFF A220 and FAS2700 - NetApp

NetApp RAID-DP technology is an important resiliency tool that can be used with virtually all common storage workloads. To learn more about NetApp RAID-DP, be sure to refer to NetApp TR-3298: Implementation of Double-Parity RAID for Data Protection and WP-7005: NetApp RAID-DP: Dual-Parity RAID 6 Protection Without Compromise.

### Back to Basics: RAID-DP - NetApp Community

A SAN sidesteps this issue and provides the block device across a network. Unlike NAS, SAN is a network storage system that requires complex technologies to maintain performance to the servers. The components can include gateway devices, dedicated switches (or VLANs on a shared network), tape backup units, controller nodes, and disk shelves.

### **NAS vs. SAN vs. DAS | Data Storage Comparison - Weka IO**

Input/output operations per second (IOPS, pronounced eye-ops) is an input/output performance measurement used to characterize computer storage devices like hard disk drives (HDD), solid state drives (SSD), and storage area networks (SAN). Like benchmarks, IOPS numbers published by storage device manufacturers do not directly relate to real-world application performance.
