The second modification made to the ideal gas law accounts for interaction between molecules of the gas. The Van der Waals equation includes intermolecular interaction by adding to the observed pressure P in the equation of state a term of the form $\frac{a}{V^2}$, where a is a constant whose value depends on the gas. The complete Van der Waals equation is therefore:

The mixture was then heated to 60 °C for 30 min. To induce palmitate-mediated insulin resistance, N2a cells were incubated with 200 μM of palmitate-BSA mixture solution for 16.5 h in culture medium supplemented with 10% FBS. N2a cells were incubated with the same concentration of palmitate-BSA mixture solution in serum-free medium for 1.5 h.
