The Competency and Values Framework (CVF) sets out nationally recognised behaviours and values to support all policing professionals. The CVF has six competencies that are clustered into three groups.

Competency and Values - College of Policing

The resulting curve pictured in this green bar chart closely resembles a steep water slide and is sometimes referred to as the Benford curve. Today, armed with any version of Microsoft Excel, CPAs can count the leading digits contained in virtually any data set, chart the findings, and compare the results to Benford's curve to see if that data set obeys the expectations set forth by Benford's Law.

The correct identification of differentially expressed genes (DEGs) between specific conditions is a key in the understanding phenotypic variation. High-throughput transcriptome sequencing (RNA-Seq) has become the main option for these studies. Thus, the number of methods and softwares for differential expression analysis from RNA-Seq data also increased rapidly.

RNA-Seq differential expression analysis: An extended ...

To illustrate this theory, Surowiecki shares a story in his 2004 book, "The Wisdom of Crowds," about Sir Francis Galton, a British statistician who made an astonishing discovery while attending a country fair at the turn of the 20th century. During the fair, there was a contest in which participants were asked to guess the weight of an ox.

Researchers have found that higher visual cognitive functions can arise spontaneously in untrained neural networks. A KAIST research team led by Professor Se-Bum Paik from the Department of Bio and Brain Engineering has shown that visual selectivity of facial images can arise even in completely untrained deep neural networks.
