The PSA TU engine is a family of small four-cylinder engines used in the Peugeot and Citroën range of cars. It was introduced in 1986 with the Citroën AX, replacing the X family, although it shared many components with its predecessor. The TU is available in either petrol or a naturally aspirated diesel variant, the latter called TUD.. The TU engine is distantly related to the older X-Type ...

The B58 timing chain was moved to the rear of the engine. Guess where the VANOS components reside? Right by the timing chain...at the back of the engine. So, we've got a bit of a headache here. Although, let's put a rumor to death quickly. Replacing B58 VANOS components does NOT require lifting the engine. This is a misconception.

The FA20E and FA20F engines have a cast aluminium alloy cylinder head with chain-driven double overhead camshafts per cylinder bank. The four valves per cylinder - two intake and two exhaust - were actuated by roller rocker arms which had built-in needle bearings that reduced the friction that occurred between the camshafts and the roller rocker arms.

Last year I wrote a rave review of the new Volvo S40. It was the first time for a long time a car had exceeded all my expectations. That test covers the 170bhp and 220bhp 5- cylinder automatics, so if they are the engine and gearbox combinations you are interested in, you'd better read it after this.
